

Chain Handle Pole Instruction

1.Chain Handle Pole Structure

1) Cyclic chain 2) Chain cyclic pole 3) Handle bar 4) Handle lock 5) Handle Button

2.Chain Handle Pole Operation Method

Push the handle lock to top, and the left side button is locked and press the right side handle button to slide top to bring the chain running. When the handle reach the limit then go back to repeat the operation, then could realize the roller blinds up and down.

Push the handle lock to bottom, and the right side button is locked and press the left side handle button to slide top to bring the chain running. When the handle reach the limit then go back to repeat the operation, then could realize the roller blinds up and down.

Note: Handle pole only slides from bottom to top not top to bottom as pressing the side buttons. If wrong operate, it will damage the chain system.
